

ABSTRACT OF THE DISCLOSURE

This invention has as its object to provide a convenient image processing apparatus which does not limit image sensing purposes. To achieve this object, an image processing apparatus has a recording medium for recording and playing back an image sensed by an image sensing unit, and an image display unit for playing back

current image. The image display unit has a display layout mode for displaying the current image sensing signal and at least the image sensed before the current image sensing signal with their partial boundary regions overlapping each other.
